Summary

I am a prolific software engineer and have created some of the most popular open source projects in the React.js ecosystem used by hundreds of thousands of developers and companies worldwide (including styled-components and react-boilerplate).

Experience

Staff Software Engineer

Gatsby

Feb 2020 - Present (11 months +)

Co-Founder

Changefeed

Nov 2018 - Present (2 years 2 months +)

"A beautiful changelog for your product in seconds"

- Strategized and launched a B2B product with two colleagues
- Responsible for architecting and building the GraphQL API served from a Node.js backend and the React.js client
- Handled product management, marketing, sales and support

Software Engineer

GitHub

Nov 2018 - Feb 2020 (1 year 4 months)

- Lead the architecture and implementation of the React.js-based frontend of a greenfield project which will soon be used by GitHub's more than 37 million users
- Planned said projects GraphQL API and contributed features to the Golang-based server
- Collaborated with teams across the company while breaking new ground to integrate a client-side web app inside the existing Rails monolith in a secure and performant manner

Technical Cofounder

Spectrum.chat

Mar 2017 - Nov 2018 (1 year 9 months)

"The community platform for the future" (acquired by GitHub in Nov 2018)

- Lead the technical implementation of a public real-time chat app for large online communities
- Responsible for architecting the GraphQL API, Node.js backend and React.js frontend

- Grew the platform to hundreds of thousands of monthly users before open sourcing the entire platform and being acquired by GitHub in November 2018

Open Source Developer

Thinkmill

Apr 2016 - Mar 2017 (1 year)

- Created styled-components, one of the most popular open source projects in the React ecosystem and the most widely used CSS-in-JS library
- Maintained KeystoneJS, the premier Node.js CMS
